

Opus Suite version 2023.0 – Release Notes

This document presents the issues which has been resolved with the release of the Opus Suite.

Key	Summary	Components
OSB-3085	The USB-key driver installation package “Sentinel System Driver Installer 7.6.1.exe” replaced with “Sentinel Protection Installer.exe” to address a security vulnerability in “Sentinel Protection Installer.exe”. The same driver is installed by both installation packages and contains no known security vulnerabilities.	USB-key driver Installer
OSB-3072	PM on item with QTYPM larger than one gives strange results	SIMLOX
OSB-3070	Help updated - Table Relations missing in CATLOC	CATLOC
OSB-3069	Scale factor is used twice when importing OPUS10-case to CATLOC	CATLOC
OSB-3067	Program hangs in model view when there is a loop in the ItemStructure table.	OPUS10, SIMLOX
OSB-3065	Apply failures only for correct realization, not on item with no failures or PM	OPUS10
OSB-3054	No error message in SIMLOX for incorrect TaskBreakdown	SIMLOX
OSB-3044	Added error checks. Station loop in ItemStationStructure, SystemStationStructure, CMStationStructure and PMStationStructure not detected when performing calculation.	OPUS10
OSB-3043	Incorrect default template includes deleted columns and can lead to application crash	OPUS10, SIMLOX
OSB-3042	New error in System_FM_ResultsTotal when looking at number of damages (NDAM)	SIMLOX
OSB-3041	Adding check empty case - Application crashes when empty cases is open and the Data menu is selected.	OPUS10, SIMLOX
OSB-3039	Help updated - Incorrect pictures in user documentation	OPUS10
OSB-3030	OPUS10 and SIMLOX shuts down if a non-existing combination of breakdown element and item is given in table PMPlan	OPUS10, SIMLOX
OSB-3029	Help updated - Replication Results ,System Events has a help topic, but the functionality does not exist	SIMLOX
OSB-3028	StationLateralSupport does not work, instead the default lateral shipment time from the from LateralSupport table is used	SIMLOX
OSB-3026	Help updated - Help text incorrect for table ItemLateralSupport. There is no group overriding anymore, instead we demand unique records	OPUS10, SIMLOX
OSB-3024	Improved performance with large reorder quantities	OPUS10
OSB-3023	SystemRealizationInitialState does not work with QTYPM > 1	SIMLOX
OSB-3022	A model with environment factor (ENVF) in the table MaterielStructure (in version <= 2019) is not converted correctly to RDM	OPUS10, SIMLOX
OSB-3021	Usage rate of 0 was handled incorrectly. The usage rates are always taken into account by removing an optimization where 0 was handled separately in the code.	OPUS10

OSB-3019	Help updated - All task types are not documented in help topic for the column	SIMLOX
OSB-3017	Wrong quantity of calendar based PM, when having Item PM on a BDE/Item with qty > 1	SIMLOX
OSB-3012	MissionFormation is not working when ENPNM=Y	SIMLOX
OSB-3004	Not all decimals are copied from report-table when using "Copy As Text"	SIMLOX
OSB-3001	Help updated - Documentation says MSUCPT does not affect simulation, which is incorrect if using mission dependency with start criteria	SIMLOX
OSB-2998	0 for IQTY in TransportProfilePolicy is not respected	SIMLOX
OSB-2994	Wrong results for MTF,STF, MTMUF in result summary, progressView and Evo	SIMLOX
OSB-2992	Help updated -Information on EFRTC is not correct	OPUS10
OSB-2991	Help updated- The picture on the ControlParameters updated to current version	OPUS10
OSB-2986	Help updated - Combination of mission type and mission system does not work as the help says, the description update to clarify the override rules for NOS/MNOS/MNOSA	SIMLOX
OSB-2984	Help updated - wrong information for ItemLateralSupport in SIMLOX	SIMLOX
OSB-2959	MTNC missing from Mission Formation Time report	SIMLOX
OSB-2830	Help updated - Add NRPA to report and userdoc	SIMLOX
