

Opus Suite version 2024.1 – Release Notes

This document presents the issues which have been resolved with the release.

Key	Summary	Components
OSB-3358	Value of UTIL in UtilizationProfile affects results even if OPHOURS is not used as measure causing events (help update).	OPUS10
OSB-3347	Large LORA case that triggers warning 255 causes OPUS10 to crash.	OPUS10
OSB-3346	Not possible to run LORA on onboard stations models.	OPUS10
OSB-3345	Warning 255 in OPUS10 gives incorrect message and has an incorrect description.	OPUS10
OSB-3340	Missing error checks for BreakdownElementUsageRate.	OPUS10
OSB-3331	Crash when trying to export, using a SIMLOX input file in OPUS10.	OPUS10
OSB-3320	Product Breakdown structure becomes greyed out when removing filters from all tables.	OPUS10
OSB-3256	Crash when creating a new row in FailureRate table.	OPUS10
OSB-3229	Subitems not handled correctly when using Usage Rates.	OPUS10
OSB-3312	Deactivate/activate rows does not work properly in combination with column filters.	OPUS10, SIMLOX, CATLOC
OSB-3353	SIMLOX Crashes when importing an OPUS10 Phased Model.	SIMLOX
OSB-3343	Selection option "stacked", give invalid presentation of results for capability results.	SIMLOX
OSB-3339	Not possible to transfer item to/from onboard station, gives error #30.	SIMLOX
OSB-3332	Instruction on where to set Lower percentile wrong.	SIMLOX
OSB-3310	SIMLOX crashed when an incorrect lower bound was used when searching for a SIMLOX time interval mapping a given time point. An adjustment of the lower bound has been done in the TimeInterval::Index findSubInterval function in TimeInterval.h.	SIMLOX
OSB-3289	Modelling Capability example text incorrect.	SIMLOX
OSB-3288	Multi column filter does not account for table OperationProfile.	SIMLOX
OSB-3287	Multi chart, chart mode separate, is not possible to zoom.	SIMLOX
OSB-3286	Traffic light does not update current value in configuration.	SIMLOX
OSB-3285	Administrative delay time not showing up in SIMLOX graph, shown in result viewer.	SIMLOX
OSB-3279	Paused non-critical maintenance at remote station causes system to get stuck and inconsistent system states to be reported.	SIMLOX
OSB-3272	Snapshot for system crashes.	SIMLOX

OSB-3271	Outstanding transfers do not take place when system has non-critical failures.	SIMLOX
OSB-3265	Use of MissionResource causes SIMLOX crash (recursion without termination problem).	SIMLOX
OSB-3260	Help incomplete on help topic: Operation parameters overview.	SIMLOX
OSB-3255	Crash when only time dependent value for lead time is used.	SIMLOX
OSB-3254	Enreg does not account for initial age.	SIMLOX
OSB-3268	Robbing decision does not work properly when reorder is involved.	SIMLOX, Opus Evo
OSB-3359	Poor help documentation on Divisor Parameters.	CATLOC
OSB-3315	CATLOC crashes when linked to a sxi with time dependent failure rates.	CATLOC
OSB-3337	Task requirements on failures in S3000L are not found when importing S3000L files into CONNECT.	Connect
OSB-3325	Source entities are missing in user documentation for S3000L CONNECT.	Connect
OSB-3324	Incorrect naming of replace tasks in product breakdown in CONNECT.	Connect
